

V-STROM 800

SUZUKI

KEY FEATURES

New, compact 776cc parallel-twin engine uses a 270-degree firing order for strong torque production and is equipped with Suzuki's exclusive Cross Balancer system for smooth operation.

Engineered for touring comfort and everyday convenience the steel frame and sub-frame, and aluminium swing-arm are supported by the new SHOWA SFF-BP (Separate Function Fork – Big Piston) fork and a gas-charged shock absorber with a hand-operated rear spring preload adjuster.

Created exclusively for the V-STROM 800 are Dunlop's D614 tires with a 19-inch front and a 17-inch rear that ride on new cast-aluminium tubeless wheels with seven, distinctive, V-shaped spokes

Visually stunning, the angular bodywork retains Suzuki's distinctive Adventure "beak", topped with modern, subtle graphics.

The Suzuki Intelligent Ride System (S.I.R.S.) includes multi-mode Traction Control, rider-adjustable ABS** with two levels of sensitivity, and the convenient Easy Start and Low RPM Assist systems.

Modern electronics include the Bi-directional Quick Shifter, Ride-by-Wire throttle, and a bright, colour TFT instrument panel, plus the Mono-focus LED headlights which are vertically stacked with a position light below a trim, height-adjustable windscreen.
