

Blade 1000 – LTX

Equipped with an 83hp 1000cc EFI V-Twin engine, this machine is extremely impressive

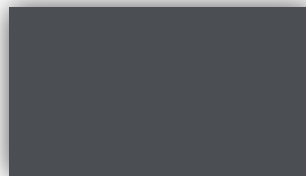

All TGB Quad Bike prices include an installed and approved Occupant Protection Device (OPD).

The Blade 1000 LTX is the latest generation of TGB`s flagship machine. The new LTX has had a facelift, with new hi-lite LED front lights seated in a more aggressive front body panel. The new front lights also incorporate LED strip indicators.

The engine on the new LTX features re-profiled camshafts specifically designed to increase bottom end torque and give a more linear power curve.

This new upgrade gives the rider more usable power in all riding conditions. Whether you are putting the machine through its paces off road or touring the countryside the Blade 1000 LTX is one of the best on the market.

COLOURS

ENGINE

Blade 1000 LTX EPS is equipped with an 83 HP strong, tried and tested 997.1cc V-twin EFI engine and offers extreme acceleration along with an electronic fuel injection system that guarantees reliable starting, clean combustion and low fuel consumption. The reliable, robust & heavy-duty automatic transmission provides high torque and supreme traction with 4WD/2WD switchable and front/rear differential lock, coupled with unmatched higher ground clearance and 52° increased front approach angle the TGB Blade 1000 LTX is not for the faint hearted. More than 2,000 units have been sold annually.

SUSPENSION

Double A-arm front and rear suspension delivers premium comfort and control in all conditions. Fully adjustable independent suspension on all TGB Blade with shocks mounted to the lower A-arm for maximum performance and a wider range of rider comfort. Fine-tune the suspension for individual riding styles and or load carrying.

STEEL FRONT & REAR RACKS

Heavy-duty front and rear racks outperform composite racks and are easy to secure large loads with 75kg capacity on the rear and 45kg up front.

INSTRUMENT GAUGE

Digital display features odometer, speedometer, trip odometer, RPM, EPS setting and fuel level. Surrounding the display are easy-to-identify indicators for transmission position, high temp, low battery, high beam, low oil pressure, check engine, 2wd/4wd and differential lock indicators.

CAPABILITIES

- Flooded Environments
- Hill Climbing
- Obstacles
- Two Seater

ATV SAFETY

Argo Australia is serious about safety on ALL ATVs, particularly quad bikes. It is no secret that there have been many fatalities involving quad bikes over the years. Here is a quick guide to assist riders to improve their own safety outcomes:

Extensive Independent studies have proven the installation of an approved OPD (Occupant Protection Device) can reduce the chance of fatality by up to **30%**.

In compliance with the Australian Regulations, TGB ATV's (in Australia) will be sold with a compliant OPD as standard equipment as of October 2021; until then all TGB dealers will offer a compliant OPD as an option.

TGB Australia supports the concept of a device that will save lives and wish to thank all concerned in particularly QB Industries for their ongoing developments of improving quad bike safety.

TGB also recommend these extra steps to improve ATV rider's safety:

1. Choose a vehicle which is fit for purpose – for the task at hand and the rider
2. Wear a helmet – the most effective safety device
3. Rider training – will allow you to fully understand both the ATV's features and its limitations
4. Don't allow passengers on single seat ATVs, and no kids under 16 on adult size ATVs
5. Strictly follow the manufacturer's guidance and warnings

Model	TGB Blade 1000 LT-X - LWB
Model Year	2023MY
Cooling System	Liquid
Cylinders Displacement	997cc
Drive System Type	2WD/4WD/LOCK
Gear Selection	L/H/N/R/P
Engine Type	4-stroke V-Twin
Fuel System/Battery	EFI
Horsepower	83HP /7000rpm
Torque	89.9 Nm / 5500 rpm
Electric Power Steering (EPS)	YES
Transmission/Final Drive	V belt CVT Automatic
Override button	YES
Electric Lock	YES
Dry Weight	970LB (440KG)
Wet Weight	1010LB (458KG)
Front Rack/ Capacity	YES / 99LB (45KG)
Rear Rack/ Capacity	YES / 165LB (75KG)
Fuel Capacity	6.08gal (23L)
Ground Clearance	12.6" (32.0cm)
Overall Vehicle Size (LxWxH)	234x125x134 cm
Payload Capacity	528LB (240KG)
Seat Height	36.1" (91.4cm)
Wheelbase	57.3" (145.5cm)
Rider Capacity	2
Front Brakes	230mm dual hydraulic discs
Rear Brakes	210mm dual hydraulic discs with 4 Rear Wheel Foot Brake
Parking Brake	Lockable Hand Lever
Front Suspension	Independent Double A-arm-8.7" (22.0 cm) Travel
Rear Suspension	Independent Double A-arm-9.4" (24.0 cm) Travel
Shock Absorbers	EVO Sports
Front Differential	Lock / Unlock
Rear Differential	Lock ONLY
Front Tires	Maxxis Bighorn 2.0 (26 x 9.14)
Rear Tires	Maxxis Bighorn 2.0 (26 x 11.14)
Wheels	Aluminium (Matt Black 12")
Battery	12V 18Ah
12V Charger	DC 12V 10A 120W
Front Bumper	YES
Rear Bumper	NO
Hitch Towing Rating	1,225 lb. (555.7 kg)
Hitch Type	2" Receiver+ Hitch Ball
Horn	YES
Instrumentation	Digital instrument panel with odometer, speedometer, Trip meter, RPM, transmission position, fuel gauge, Hi-Temp/Low-Batt lights, high beam light, EFI checking, differential indicator, 2WD/4WD indicator
Lighting	Dual 60w low/high beam lights, Dual Brake lights, Taillights
Colour	Only available in Mountain Grey
