

## TGB Blade 600SE-X EPS

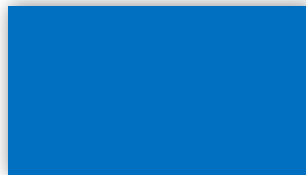

The Flagship Blade 600SE-X EPS model is built on a rugged steel chassis featuring premium double 'A'-arm front and rear independent suspension with extended travel for optimal comfort and handling. With class leading features such as Tri-Mode EPS and a 42 Horsepower EFI Engine this is one good looking tough workhorse!

Sample Photo Only. Please note some accessories may not be included in some Countries

### COLOURS

### ENGINE

The all-new 600 Series TGB ATV comes with a new 561 cc, 42h.p single cylinder 4-stroke engine featuring Electronic Fuel Injection (EFI), single overhead cam and liquid cooling with an auxiliary fan that provides consistent performance in the most demanding conditions. This engine is clean and delivers class-leading horsepower and incredible torque.

### ELECTRONIC POWER STEERING

All conveniently set from the digital display, the Tri-Mode Speed Sensing Electronic Power Steering (TMSS EPS) not only senses the ATV speed for varying levels of assist, the rider can select no assist, minimum assist

### SUSPENSION

Double A-arm front and rear suspension delivers premium comfort and control in all conditions. Fully adjustable independent suspension on all TGB Blade with shocks mounted to the lower A-arm for maximum performance and a wider range of rider comfort. Fine-tune the suspension for individual riding styles and or load carrying.

### STEEL FRONT & REAR RACKS

Heavy-duty front and rear racks outperform composite racks and are easy to secure large loads.  
Rear capacity - 165lbs / Front capacity - 99lbs.

### INSTRUMENT GAUGE

Digital display features odometer, speedometer, trip odometer, RPM, EPS setting and fuel level. Surrounding the display are easy-to-identify indicators for transmission position, high temp, low battery, high beam, low oil pressure, check engine, 2wd/4wd and differential lock indicators.

## CAPABILITIES

- Flooded Environments
- Hill Climbing
- Multi-Passenger
- Obstacles

## ATV SAFETY

**Argo Australia** is serious about safety on ALL ATVs, particularly quad bikes. It is no secret that there have been many fatalities involving quad bikes over the years. Here is a quick guide to assist riders to improve their own safety outcomes:

◆ Extensive Independent studies have proven the installation of an approved OPD (Occupant Protection Device) can reduce the chance of fatality by up to **30%**.

◆ In compliance with the Australian Regulations, TGB ATV's (in Australia) will be sold with a compliant OPD as standard equipment as of October 2021; until then all TGB dealers will offer a compliant OPD as an option.

◆ TGB Australia supports the concept of a device that will save lives and wish to thank all concerned in particularly QB Industries for their ongoing developments of improving quad bike safety.

### **TGB also recommend these extra steps to improve ATV riders safety;**

1. Choose a vehicle which is fit for purpose – for the task at hand and the rider
2. Wear a helmet – the most effective safety device
3. Rider training – Fully understand both the ATV's features and its limitations
4. Don't allow passengers on single seat ATVs or kids under 16 on adult size ATV
5. Strictly follow the manufacturer's guidance and warnings
