

Vespa® Sprint 150

THE BRAND NEW SPRINT

As its name suggests, this is the sportiest and most dynamic "small body" Vespa in the whole range.

Today's Sprint builds on the heritage of the sporty Vespas of the '60s and '70s whilst retaining the features that made them so successful with the generation of the time, such as the sport design saddle, the red rear shock damper and the rectangular front headlight.

These traditional strengths have now been joined by the features and technology of a modern scooter, such as LED lights, analog-digital instrumentation, improved comfort, the safety of the ABS system, a new front suspension and 12" wheels mounted for the first time on a "small body" Vespa.

All this makes the Sprint the ideal Vespa for anyone who wants to zip round town in style and with ease.
